

Regular planned dental cleanings allow your pet to maintain a healthy mouth environment which results in a better overall health of your dog or cat. Due to the amount of time necessary to appropriately manage dental disease in our patients, Trusty Vet does not currently perform Dental Cleanings. Dental health is important to your pet and we recommend that you use a veterinary hospital near your home for routine dental cleanings.

Trusty Vet offers a number of dental health products that can delay the progression of dental disease and it can help prolong the time until a dental cleaning is needed.
